Please note we adjusted the meeting to start at 10 instead of 10:30, hope this isn't a problem. The NCG would like to discuss the following:

- A potential "re-set" meeting with NCG and NYCDEP now that the Order with the City is moving forward, as related to expectations around PRGs.
- Importance of equity and consistency for NCG with whatever benchmarks or metrics are used
- There has been some talk of a "vision" or adaptive management document that would serve as a road map for the remediation on the project and help provide the context for the Early Action and the pilot/treatability study, would like to have some further dialogue around purpose and need for that document
